## Governor's Office of Drug Control Policy

### ISSUE

This **Issue Review** provides information on the role of the Governor's Office of Drug Control Policy as it relates to substance abuse and statewide coordination of efforts for prevention, treatment, and enforcement.

### AFFECTED AGENCIES

Governor's Office of Drug Control Policy  
Department of Corrections (DOC)  
Department of Education  
Department of Public Health  
Department of Public Safety (DPS)  
Department of Human Services (DHS)

### CODE AUTHORITY

Chapter 80E, Code of Iowa

### BACKGROUND

The Governor's Office of Drug Control Policy, formerly the Governor's Alliance on Substance Abuse (GASA), was originally established in 1987 under the Department of Public Health. In 1989, the Alliance was transferred to the Drug Enforcement and Abuse Prevention Coordinator, a position appointed by the Governor, and an agency separate from the Department of Public Health.

The Alliance was given independent status in 1989 due to the overall mission of coordinating with several State agencies and the resources managed by the Alliance required extensive interaction with the criminal justice and law enforcement systems. This was considered to be incompatible with the mission of the Department of Public Health.

During the 2000 Legislative Session, HF 2153 (Drug Policy Coordination Act) changed the name of the Alliance to the Governor's Office of Drug Control Policy and the title of the Drug Enforcement and Abuse Prevention Coordinator to Drug Policy Coordinator. The Act also created the Drug Policy Advisory Council by combining three councils under the purview of the Office.

## CURRENT SITUATION

The mission of the Governor's Office of Drug Control Policy is to develop drug control initiatives within a comprehensive strategy. The Office, as required by Chapter 80E, Code of Iowa, coordinates and collaborates on an on-going basis with a core group of other State agencies, including the Departments of Corrections (DOC), Education, Public Health, Public Safety (DPS), and Human Services (DHS), to become familiar with all programs affecting substance abuse and drug trafficking.

The Office is required to submit an annual report to the Governor and the General Assembly concerning its activities and programs and those of other departments in relation to substance abuse prevention and education programs, substance abuse treatment programs, and drug enforcement. **Attachment A** provides a summary from the Office's 2002 annual report of all estimated FY 2002 state and federal funding of Iowa substance abuse programs, including prevention, treatment, and enforcement efforts.

In addition, the Drug Policy Coordinator assists in the development of local and community strategies to fight substance abuse, including local law enforcement, education, and treatment activities. The Coordinator also chairs the Drug Policy Advisory Council, which consists of a prosecuting attorney, substance abuse treatment specialists, law enforcement officers, a prevention specialist, a judge, and representatives from the DOC, Department of Education, the Department of Public Health, the DHS, the DPS, and the Department of Human Rights. The Council reviews and approves the drug control strategy and subsequent annual report.

During the last year, the Office has collaborated with the Department of Public Health to transition certain prevention programs from the Office to the Department of Public Health, Division of Health Promotion, Prevention, and Addictive Behaviors. As part of this process, three of the Office's main prevention programs, including the Substance Abuse Free Environment (SAFE) Program, the Drug-Free Workplace Education Program, and the Iowa Mentoring Partnership are proposed for transfer to the Department of Public Health. The reason for the proposed transfers is to avoid duplication as these types of programs are now required to be administered under the federal Preventive Health and Health Services Block Grant, which is administered by the Department of Public Health. The transfer of the programs, including 2.0 FTE positions, is planned for FY 2004.

## FUNDING

The Governor's Office of Drug Control Policy received a FY 2003 net General Fund appropriation of approximately \$255,000 and 11.0 FTE positions. **Table 1** details how the appropriation will be utilized for FY 2003. The majority of the FY 2003 appropriation (\$171,000) will be used to cover the required administrative match for three federal block grants.

Of the 11.0 FTE positions, 10.0 are filled, with one vacancy due to an early retirement. All FTE positions are federally funded, with the exception of 0.25 FTE position for the Drug Policy Coordinator and 0.10 FTE position for the Associate Director that are paid from the General Fund appropriation. Federal guidelines do not permit the position of the Drug Policy Coordinator to be 100.0% federally funded due to the amount of time the Coordinator devotes to activities that are only State-related, such as lobbying for federal funds.

**Table 1**  
**Governor's Office of Drug Control Policy**  
**Budget for FY 2003 General Fund Appropriation**

<u>Position or Program</u>	<u>Description</u>	<u>Amount</u>
Drug Policy Coordinator	0.25 FTE position	\$ 24,694
Operational Budget for Drug Policy Coordinator	Communications, equipment, printing, supplies, travel, and utilities	51,033
Associate Director	0.10 FTE position	8,622
Federal Byrne Block Grant	State Matching Funds	163,841
Federal Local Law Enforcement Block Grant	State Matching Funds	1,111
Federal Residential Substance Abuse Treatment for Prisoners Block Grant	State Matching Funds	5,803
<b>Total</b>		<u><u>\$ 255,104</u></u>

### **DRUG ABUSE RESISTANCE EDUCATION (DARE) PROGRAM FUNDING**

The Drug Abuse Resistance Education (DARE) Program is a school-based prevention training curriculum for students in kindergarten through high school. The Governor's Office of Drug Control Policy has not received a General Fund appropriation for the Program since FY 2001, when \$80,000 was appropriated. No federal funds are used for the Program. The Office receives revenues from surcharges assessed on fines for convictions of Operating While Intoxicated (OWI) and for convictions relating to offenses for the possession, manufacture, or delivery of controlled substances. The Office is required to use these funds for drug abuse resistance education programs, which may include, but are not limited to, the DARE Program.

When the General Fund appropriation for the DARE Program was eliminated, the surcharge amount was raised from \$5.00 to \$10.00. In FY 2002, the Office received approximately \$91,000 from surcharge fees that were used to provide funding to the DARE Association for the purchase of t-shirts and workbooks for students that participate in the training curriculum. During the 2001-2002 school year, approximately 38,000 Iowa students received the training curriculum. It is anticipated the surcharge fees will generate an estimated \$115,000 in revenue for FY 2003.

### **FEDERAL GRANT ADMINISTRATION**

The Governor's Office of Drug Control Policy administers federal grants for the purpose of improving the criminal justice system through support of drug enforcement, abuse prevention, and criminal justice treatment programs across the State. In addition, the Office provides program and fiscal technical assistance to State and local agencies, as well as program evaluation and grants management.

The Office will receive an estimated \$8.1 million in federal block grant and discretionary funds in FY 2003. The following list is limited to the major federal block grants administered by the Office that require match from the General Fund appropriation.

- **Edward Byrne Memorial State and Local Law Enforcement Assistance Grant Program** - Federal block grant program that assists State and local units of government with projects designed to reduce crime and improve the effectiveness of the criminal justice system, reduce the availability and demand for illegal drugs, increase offender accountability and improve offender habilitation, and enhance youth and family wellness. The Office reports that over 50.0% of this grant is used to provide funding to 25 local drug task forces, and the Office provides coordination and oversight to these task forces. An estimated \$6.5 million will be received for State FY 2003, which includes carryover funds from FY 2002.

The Office is permitted to retain up to 10.0% of the grant for administration that must be matched on a 3-to-1 matching basis. For every three dollars in federal funding, the Office must provide one dollar of State match. For FY 2003, the Office has budgeted approximately \$492,000 of the grant for administration, which will require approximately \$164,000 from the General Fund appropriation for State match. The Office awards the funds on a competitive basis to State and local government sub-recipients who are required to provide a 25.0% cash match.

- **Local Law Enforcement Block Grant Program (LLEBG)** - Federal block grant program that provides financial assistance to state and local units of government for projects that reduce crime and improve public safety. An estimated \$342,000 will be received for State FY 2003, which includes carryover funds from FY 2002.

The Office is permitted to retain approximately \$10,000 (3.0%) of the grant for administration that must be matched with approximately \$1,000 from the General Fund appropriation. The Office awards the funds on a competitive basis to State and local government sub-recipients that are required to provide a 10.0% cash match.

- **Residential Substance Abuse Treatment for State Prisoners Grant Program (RSAT)** - Federal block grant program that provides funding to implement residential substance abuse programs for individual and group treatment activities for adult and juvenile offenders in residential facilities, including jail, prison, community corrections residential facilities, and juvenile facilities. An estimated \$840,000 will be received for State FY 2003, which includes carryover funds from FY 2002.

The U.S. Department of Justice approves the use of administrative funds from this grant on a case-by-case basis. For FY 2003, the Office has been permitted to retain approximately \$25,000 (3.0%) of the grant for administration that must be matched with approximately \$6,000 from the General Fund appropriation. The Office awards the funds selectively to qualifying State prisons, community corrections agencies, and DHS-supported institutions for programs that house inmates and meet strict federal guidelines. The programs are required to provide a 25.0% cash match.

## **SUBSTANCE ABUSE PREVENTION PROGRAMS**

The Governor's Office of Drug Control Policy receives federal discretionary grant funds to support drug enforcement and substance abuse prevention efforts and programs administered by the Office. Since FY 1999, it is estimated that the Office has secured an estimated \$4.8 million in federal discretionary funds to be used for the enhancement of drug control measures.

Federal discretionary funds fluctuate from year to year and do not require State matching funds. The Office reports that the majority of these non-formula grants are the outcome of on-going negotiations between the Drug Policy Coordinator and Iowa's Congressional delegation and federal

agencies. The following list provides the main substance abuse prevention efforts and programs provided by the Office. Some, but not all, are provided with the use of federal discretionary funds.

- **Face It Together (FIT)** - The Office coordinates the activities of the FIT Committee, which is comprised of representatives from the business, medical, law enforcement, treatment, prevention, media, religious, school, and government communities. Activities include a drug-free workplace education program, a faith-based initiative, and a youth mentoring program.
- **Interactive Methamphetamine Education Program** - An interactive computer education program designed to educate 5<sup>th</sup> and 6<sup>th</sup> grade students about the dangers of methamphetamine. CD-ROM kits were distributed to almost 500 sites during the 2001-2002 school year. While only a small number of schools have reported back to evaluators to date, 75.0% of educators that returned evaluations gave the five-lesson Program a grade of "A".
- **Iowa Mentoring Partnership (IMP)** - The Partnership networks local programs throughout the State to identify needs and engage more lowans in mentoring that has been reported in national research studies as being effective in deterring youth from using illegal drugs and alcohol and engaging in truancy and violence.
- **Iowa Substance Abuse Free Environment (SAFE) Community Program** - Assists communities in forming coalitions to address substance abuse and related problems. The process of becoming a SAFE community leads coalition members through an analysis of community needs and resources and requires that an action plan to address those needs be created. Since the beginning of the Program in 1989, a total 115 Iowa communities have completed the SAFE community certification process.
- **Iowa Substance Abuse Information Center** - Iowa's one-stop clearinghouse for substance abuse information, treatment referral, and crisis counseling. In FY 2002, the Center's web site recorded 87,844 users, the toll-free hotline averaged 50 calls per month, and more than 3.8 million pieces of health materials were distributed across the State.
- **Partnership for a Drug-Free Iowa (PDFI)** - A private, non-profit organization consisting of Iowa leaders from the media, advertising, and business sources. The partnership conducts a statewide multi-media public service awareness campaign aimed at reducing the incidence of substance abuse by shaping attitudes and impacting behavior. The campaign nets approximately \$2.0 million in donated media time each year.

## ALTERNATIVES

The following alternatives have been suggested with regard to the Governor's Office of Drug Control Policy that the General Assembly may wish to consider:

- Transfer the responsibilities of the Governor's Office of Drug Control Policy to the Department of Public Health.

Given the Office's current drug enforcement coordination activities and administration of federal, State, and local law enforcement grant funds, the General Assembly may wish to consider the practicality of the Department of Public Health performing these duties in relation to its mission of promoting public health programs.

- Transfer the responsibilities of the Governor's Office of Drug Control Policy to the DPS.

The DPS receives funding from the federal Byrne Memorial State and Local Law Enforcement Block Grant administered by the Office of Drug Control Policy. If the DPS became the administering agency, federal guidelines might not permit the Department to be eligible for the funds. If federal guidelines would permit this, certain oversight measures might be necessary to ensure that a conflict of interest would not arise by having a State law enforcement agency that is eligible to receive the funds administer them.

In addition, given that a portion of the federal Byrne grant funds and all of the Residential Substance Abuse Treatment for State Prisoners (RSAT) grant funds provide funding for treatment initiatives, such as Drug Courts and in-prison therapeutic communities, the General Assembly may wish to consider the practicality of the DPS assuming responsibility for administering these funds based on the treatment role of Drug Courts versus the enforcement role of the DPS.

- Divide the prevention, treatment, and enforcement program responsibilities of the Governor's Office of Drug Control Policy between the Department of Public Health and the DPS.
- Maintain the Governor's Office of Drug Control Policy as an independent State agency.

### **BUDGET IMPACT**

The FY 2003 General Fund appropriation of approximately \$255,000 for the Governor's Office of Drug Control Policy provides funding for a total of 0.35 FTE position (\$33,000), the Drug Policy Coordinator's operating budget (\$51,000), and State matching fund requirements for federal funds (\$171,000).

If the current responsibilities of the Office and the Drug Policy Coordinator were transferred to another State agency, the cost savings to the General Fund would be minimal, if any.

If the General Assembly chose to transfer only certain responsibilities to another agency by re-defining or eliminating the role of the Drug Policy Coordinator and/or Associate Director, some cost savings to the General Fund might be recognized depending on how the General Assembly might choose to fund or not fund the two positions. While cost savings to the General Fund of some amount would occur, the State could lose a substantial amount of federal discretionary funds that are secured through the work of the Drug Policy Coordinator and Associate Director.

If the General Assembly chose to reduce the amount of funding allowed to be retained by the administering agency for the administration of the Byrne Memorial State and Local Law Enforcement Block Grant and the Local Law Enforcement Block Grant, some cost savings could be recognized because the amount of General Fund money needed to provide a match would be reduced.

The Legislative Fiscal Bureau (LFB) is available to assist legislators in exploring alternatives with regard to this information or others that may be identified.
